ng Company, a Heinze concern organ-a few years ago during the trouble

Mining Company, a Heinze concern organized a few years ago during the trouble with the Amalgamated. A judgment was had for \$14,000 a short time ago against the company. The Sheriff has reported that he is unable to find any property to levy against. An application also has been made for a receiver for the Pittsburg and Montana company in consequence of the failure of the company to pay a judgment for \$18,000 and on the strength of the Sheriff reporting that he was unable to find any property to satisfy the judgment.

The Pittsburg company is capitalized at \$30,000,000, and the Hypocka company is capitalized at \$30,000,000, and the Hypocka company is capitalized at \$30,000,000, and the Hypocka company of Butte, with a capital stock of the Sheriff resporting that he were companies have refused to accept service on the ground that they no longer represent them. As both companies are liable to the full amount of their capital stock the attorney who made applications for both receivers himself the full amount of their capital stock the attorney who made applications for both receivers himself the full amount of the stockholders.

The Davis-Daly company is prosecuting work in the Colorado mine. The west cross-cut on the 1,800, level is in the vicinity of the first tone work in the Colorado mine. The west cross-cut on the 1,800, level is in the vicinity of the street from the stockholders.

Colorado Springs, March 2—The January production of the Vindicator mines, and the vicinity of the first concentration of the Vindicator mines, and the vicinity of the street from the stockholders.

Colorado of the Vindicator mines, and the vicinity of the street from the vicinity of the street from the vicinity of the street from the stockholders.

samples of ore received from the Montana bin Copper Company properties near rbin give an assay return of 7.19 per cent. oper, about 40 cents in gold, and more in eight ounces of silver to the ton. The was taken from the crosscut on the 400 et of the main lead in the hanging wall, so believed that even a much better quality ore will be found on the foot wall side the vein, as on the 235 foot level where ore body was fairly well opened up best values were on the foot wall side, the 235 foot level there is two feet of h grade ore.

On the 235 foot level there is two feet of high grade ore.

R. M. Atwater, general manager of the Butte and Superior Copper Company, has made a trip of inspection to the Basin Reduction Works where the ores of his company are being treated. The Butte and Superior is at present sending 250 tons of ore daily to the Basin concentrator and arrangements have been made further to increase the capacity of the section now being used for the handling of this ore.

Supt. W. C. Hosking of the Calumet-Corbin company reports that the company, which was formerly controlled by Michigan capitalists, is now controlled by St. Paul and Duluth people, who propose to start active apitalists, is now controlled by other active buluth people, who propose to start active evelopment work at once. The company has inspected certain properties in the tadersburg district with a view to buying

Butte is in the throes of another labor treuble. Some of the mines are idle and others are running with about half their usual force. This time the trouble has arisen between the two factions of engineers and the Mill and Smeltermen's Union as to jurisdiction over the ollers. At the request of the latter organization an oller was discharged because he belonged to the International Engineers Union and refused to pay dues to the smelt-symbol. Union and refused to pay dues to the smeltermen's union.

The international body demanded his
reinstatement and on the demand being
refused they left their engines after giving
several days notice in the event of their
request not being complied with.

The Western Federation of Miners, to
which the Mill and Smeltermen's Union
is affiliated, claim jurisdiction over all
engineers belonging to the international
union refuse to recognize this claim.

All the carpenters, blacksmiths, machinists, pumpmen, ropemen and electricians employed at the various mines are
connected with the international organization and it is said that there is an understanding with the international engineers
that should it be necessary all these men
will walk out.

that should it be necessary all these men will walk out.

HELENA, March 2 —Tests conducted here for the last two months by Dr. C. A. Burwell of Cleveland and C. C. Titus of the Northwestern Metals Company are intended to revolutionize the treatment of cobalt often. Samples of the ores were treated under what is known as the oblorinization process. It has been demonstrated that by this method the companies will get \$500 more a ton than they now get from the smelters for their often.

THE SLOGAN OF THE CAMERON-CHARACTER THE GRANDEST THING. THE CAMERON, in use the world over, and conceded to be the most serviceable, durable and effective Station and Sinking Pumps on the market to-day. Often imitated, never equalled. and Montana—Activity in Badersburg.

BUTTE, Mon., March 2.—The Santa Anita
nine in the Radersburg district is a new
property and is being opened by a tunnel
difft, which has proceeded along the veins
a distance of 200 feet. The last fifty feet
have been in ore, the shoot varying in width
from one to three and a half feet and having
an assay value of \$80 to \$80 a ton. What ore
is being taken off in the course of development work is being stored.

There are no other producing mines in
the immediate vicinity of the Santa Anita,
anoid.

There are no other producing mines
in the immediate vicinity of the Santa Anita,
though the old Ruby mine, which was a
good producer many years ago, is near by,
while the North Home, another old producer, is about two miles north of the Santa
Anita.

The Black Friday, probably the largest
gold ore shipper in the Radersburg district,
is about four miles from the Santa Anita.

In the vicinity of the Black Friday are the
properties of the Keasting Gold Mining Company and the Ohlo Keating Company, both
producers and shippers, whose stock is
widely distributed.

Secretary Harrington of the TuolumeCopper Company is authority for the statement that in the month of January the
company produced 728,000 pounds of copper.

In the output was silver valued at \$8,491.

The Black my Harrington of the Tuolumes
Copper Company is authority for the statement that in the month of January the
company produced 728,000 pounds of copper.

The Boston-Corbin has made on the first the chief value of a
district, has announced a divided of s
cent and a half a share, which involves a
distribution of \$22,000. This is the same
and ro 141,400 as short time ago against the

Appointment of a receiver for the Hypocka

A feet first that the

its own ores. This company is said to be considering the removal of its smelter to a point close to the railroad and increasing its capacity to 500 tons a day. It is in the Johnson district.

The new machine drill that will soon be installed in the mine of the Arizona-Morenci Mining Company in the Morenci district will exploit the property to a depth of 2,500 feet. Two churn drills are in operation and a depth of 500 feet has been reached with good results.

A large body of high grade zinc ore was recently encountered in the Flux mine in the Patagonia district. This mine has been a large producer of lead-silver ore for the last twenty years.

The New York-Arizona Gold and Copper Company is reported to have suspended mining operations in the Morenci district and has established a chicken ranch upon its mineral land. At present prices of eggs and chickens the officers of the company say there is more money in that business than in mining.

A vein of ore running high in copper, gold and silver recently was struck in the Sunny South mine in the Bisbee district. The mine is owned by People & Mayfield. They will sink a shaft to a depth of 130 to 200 feet, with a view of striking a ledge of ore.

It is reported that the Cochise Development Company will soon reopen its mine, which was closed down in 1908.

A syndicate of Eastern men are said to be negotiating for the purchase of La Soledad mine in the Ajo Mountains. Several cars of good ore were recently shipped to the smelter at El Paso, from this property.

Pence Bros. of El Paso, Tex. have done about 230 feet of development work upon their Snow Storm group of claims.

NEW MEXICO.

Silver City, March 2;—An ore body that

about 250 feet of development work upon their Snow Storm group of claims.

NEW MEXICO.

SILVER CITY, March 2.—An ore body that runs from \$12 to \$28 gold a ton was recently encountered in the Homestake mine south of Las Veges. It is owned by Brown & Lillis. There is also a good showing of lead carbonate carrying gold in this property. George Dunktin and a number of Fort Worth. Tex., men have bought the placer holdings of the Texas-Jarilla Mining Company, embracing 240 acres, in the Orogrande district. The old mill of the company will be rehabilitated.

Christ Yeager and Andrew Baine, who recently got a bond on the Wilson mines in the White Oaks district, have started development work on the property.

The Penn Misning Company has cut several veins of ore in tunnels at the 500 foot level of its mine in the Pyramid district. The ore runs 3 per cent. copper and four ounces silver to the ton.

The Lordsburg Mining and Reduction Company has begun sinking its shaft from the 300 foot level. A five foot vein was struck at that level and followed thirty-five Iran as high as 325 ounces silver.

Charles Zieger of El Paso, who recently purchased the Broken Jug mine in the Sylvanite district, is said to be negotiating for the purchase of the Wake Up Charley mine in the same district.

The second secon

countered on the 1,000 foot level of the New York Bonansa at Park City. A drift was sent out recently from the bottom of the shaft to tap the are body which was spended in the upper levels. A few days ago a stringer of galena was found and a drift started on it. This has developed twelve linches of high class ore, with the appearance of increasing in size.

The 210 foot shaft of the Bullock mine in Tintic is to be sunk another 100 feet. Ore in the stope from the 210 level has been nearly exhausted, it is asid, but it is the intention to start another stope from the lower level as soon as arrangements can be made to control the water. Two carloads of ore have been shippped and twenty fons of high grade is in the bins. In the north drift stringers are being encountered that learn the larger and components compared the larger that the sent to the control that the larger that the components components.

inorth drift stringers are being encountered that assay 12.5 per cent. copper, twenty-five ounces in silver, 27 per cent. lead and 31.50 gold.

Sonora, the ore running 4,000 ounces of silver a ton. The strike has attracted much attention to that district.

The new mining law of Mexico contains a clause requiring the registration of all mining titles, old and new, under penalty of forfeiture. Titles issued prior to the commencement of the new law must be registered in their respective districts before July 1, 1910. Another impertant prevision of the new law is that which stipulates that no title to a mine shall be issued until the boundary of same shall have been marked by substantial monuments.

Froperties to which title was obtained under the old law must be marked with these monuments before January 1, 1911, or the right to the property will be lost should another person denounce it. The penalty for destroying or removing any monument from a mining claim is a fine of 1,000 and five years in the penitentiary. Any one removing ore from a mining claim before the title to askne has been granted is also liable to a fine of \$1,000 and five years in the penitentiary. These are some of the provisions of the new law which are likely to make trouble for American mine owners in Mexico who have not kept themselves advised of the changes.

The recent annual report of the Guanajuato Reduction and Mines Company, which has its headquarters in Colorado Springs, Col., shows that its returns from the saie of electric power in the Guanajuato district last year amounted to \$700,000.

The Tajo Mining Company, which operates the Tajo mines in the San Sebastian district, State of Jalisco, will use the water that, flows from the long tunnel that is being driven to cut the Tajo vein to genera to the electric current for operating the machinery of its mines and mill. The water will be carried 2,000 feet and will get a fail of 1,000 feet.

Dwight Furness of Guanajuato, W. E. Butcher of Dolores Hidalgo and Walter Cross Buchanan of San Luis de la Par have acquired title to about thirty acres of mineral land in the Dolore Hidalgo district, State of Guanajuato. They have named the

BRITIBE COLUMBIA.

SEATTLE, Feb. 28.—Extensive mining properties owned by Seattle men in the Portland Canal district in British Columbia close to the Alsaka boundary line have been financed by D. D. Mann and his associates in the Canadian Northern Railroad and will be developed during the coming season, according to W. R. Tonkin, who returned Thursday of last week from an extensive business trip on which he sold for himself. J. W. Edgecomb and other associates, the controlling interest in the Mountain Boy Mining Company.

Mr. Tonkin and Mr. Edgecomb closed the deal in Toronto for the transfer of the property. Mr. Tonkin said that a \$3,000,000 corporation to be known as the Mountain Boy Mining Company, Limited, has been organized by Mackenzie & Mann and associates for the purpose of developing the property. Mr. Tonkin also said that the Canadian Northern Railroad has made

to be furnished 1,000 tons of ore a day from the start and 3,000 tons a day within a year. In the English syndicate which held the option on the Ikeda mines has lost the option on the Ikeda mines has lost the property owing to the option expiring before they were able to complete arrangements and a Vancouver syndicate, at the head of which is S. C. Castleman, has bonded it for 250,000. Two payments have already been made and the bond covers a period of two years.

Mr. Castleman said he and those behind him felt confident of success. He had examined the property and knew that the reason it had come into the market was only on account of the inexperience of those who were running it and financial difficulties resultant in the shortage of money in Japan just how.

The Tyee smelter records show that \$22 after shipping and smelting charges had been deducted.

The likeda mine is one of those lucky finds that come to the fortunate rovers. It was discovered by Japanese fishermen who were driven to take refuge in the bay by a storm. As they were unable to get away for some days they began prospecting and discovered ore, which they had assayed. As the assay was good they went to Japan and there reissed the money to begin operations.

The present company intends making many alterations in the plant and is hope-

where the control of the control of

TAKING UP BESSEMER.

PITTSBURG, Fa., March 6.—The prospects are that the Steel Corporation will buy 35,000 to 50,000 tons of bessemer iron the fore part of this week, which will take practically all the available beasemer to be had in this market up to May 1. Negotiations were begun for the iron the middle of last week, but on Friday the word went out that no definite action would be taken before Monday or Tuesday.

The corporation is not short of iron, but the additional tonnage will allow several trust furnaces that are badly in need of repair to go out of blast. Deliveries probably will be specified to begin April 1 and run through the second quarter. The price will be 318 valleys, the ame figure at which the combine took 40,000 tons from valley makers to May 1.

bine took 40,000 tons from valley makers two weeks ago. Deliveries on this first purchase by the Steel Corporation began purchase by the Steel Corporation began March 1. The last of the bessemer iron in the bands

March 1.

The last of the bessemer iron in the bands of brokers was taken up last week, when a block of 20,000 tons was bought by two steel making concerns in this territory for delivery soon after April 1. The price paid was \$18, with a concession in the way of interest charges on the iron between now and April 1.

Bids which went in last Friday on the 18,000 ton inquiry of the Westinghouse Electric for foundry iron for second half delivery showed a wide range of prices. It is understood some of the quotations on the No. 3 grade varied nearly \$1 in price. The full allotment of the electric company's purchase has not been announced, but it is known that some of the No. 2 iron was got under \$16.25 valleys for delivery July 1. It is thought the full 15.000 tons was apportioned, including \$,000 tons of No. 2. and 3 iron and 3,000 tons of No. 2. and 3 iron and 3,000 tons of No. 2. and 3 iron and 3,000 tons of No. 2. and 3 iron and 3,000 tons lone, including 1,000 tons by the Westinghouse Machine Company for early delivery; 2,000 tons for the International Steam FumpCompany in addition to the 10,000 tons taken by that concern a week ago; 6,000 tons taken by that concern as week ago; 6,000 tons for an Ohio foundry interest for second half deliveries and seattering inquires from local consumers.

For basic iron three Pittsburg district consumers are inquiring for a total of 12,000 tons. The inquiry by \$1. Louis interests for 500 tons of bessemer also has been filled in the West, when according to report, basic producers are shading the market. The inquiry by a Norwalk, Ohio, furnace having given concessions on a tonnage of 400 tons of prompt bessemer, which will tide the buyer over for the present to boost prices on pig iron above the low price levels of February, arguing that conservative prices will assist in building up the market better than a skyrooket becom.

The price situation in finished materials is better than a week ago. Merchant pipe and structural materials are much stronger, though there is a further so

BUSINESS CHANCES.

## Confidence

A few days before the end of the only battle that Mr. Harriman ever lost, a conceited financial prophet returning from Arden conscientiously predicted the speedy return of the brave little Wall street corporal to the battle ground. UNION PACIFIC was then around 210, and since the inevitable, lamentable loss of its brainy, far sighted sponsor it declined rapidly to 178.

Inevitable war with Japan is now regrettably prophesied with equally conceited financial conscience and probable equally inaccurate fulfilment.

financial conscience and probable equally inaccurate fulfilment.

Unconsciously ROCKFORT, VESTFORT, HOSENFORT, ALLESFORT—recollections revive vividly in the minds of veteran international financiers.

When America's greatest banker, Mr. J. Pierpont Morgan, returned from Europe a few years ago with imperial ORDERS of honor and distinction from Italy's King and Turkey's Sultan, even youthful financiers distinctly recollect the ORDERS presented in 1903 to certain other financiers in the form of subpoenas in the insurance candals. Union Pacific then broke over 20 points, with many friends of the subpoenaed financiers heavily loaded.

The Equitable is now in the safe keeping of Mr. J. Pierpont Morgan.

While Mr. Morgan, Mr. Vanderbilt and Mr. Vanderlip are abroad, while Mr. Rockefeller without estentation modestly lays the corner stone to the greatest charitable foundation ever known in the whole history of this world's civilization, the Return from Elba Club plans a seception to the shrewdest, ablest builder of cases hatred in the New World.

A NOTABLE ACHIEVEMENT.

The financial author of the Casandra speech prophesying panic in Wall street just previous to the memorable increase in UNION PACIFIC'S dividend to 10% is on the reception committee for the globe trotting game exterminator.

CONFIDENCE amongst America's business men and Americans, which I referred to a month ago in the middle of the gloom as being arduously, carefully and honestly encouraged by President Taft, Congress and the Supreme Court—the executive, legislative and judiciary branches of our government—this CONFIDENCE cannot, to my way of thinking, be upset even temporarily by foreign bankers, foreign amarchists or writers even if assisted by returning dethroned demagogues.

The way of thinking age of UNION PACIFIC and JAPANESE BONDS will

To my way of thinking even UNION PACIFIC and JAPANESE BONDS will advance on the last calamitous prophecies.
